

## List of Contents

Volume 4 Number 1/2

1988

International Conference on Manufacturing Science, Technology and Systems of the Future, Ljubljana, Yugoslavia, 1985

### Contents

#### *Papers*

- |   |  |
|---|--|
| M. E. MERCHANT  | 1 The precepts and sciences of manufacturing   |
| G. SPUR   | 7 Advanced manufacturing systems   |
| O. I. FRANKSEN and Ø. BJØRKE                                      | 13 Manufacturing systems theory and its relation to the basic disciplines of science: from measurements to systems             |
| I. BRATKO   | 27 AI tools and techniques for manufacturing systems   |
| F.-L. KRAUSE, P. ARMBRUST and M. BIENERT                          | 33 Methodbases and product models as bases for integrated design and manufacturing   |
| R. WEILL  | 41 Integrating dimensioning and tolerancing in computer-aided process planning   |
| J. GRUM, B. LOGAR, G. HLEBANJA and J. PEKLENIK                    | 49 Design of the database for CAD based on group technology  |
| J. DEKLEVA, J. KUŠAR, D. MENART, M. SARBEK and E. ZAVADLAV        | 63 Extended production flow analysis   |
| V. R. MILAČIĆ and M. UROŠEVIĆ                                     | 69 SAPT—knowledge-based CAPP system  |
| A. SLUGA, P. BUTALA, N. LAVRAČ and M. GAMS                        | 77 An attempt to implement expert system techniques in CAPP  |
| A. POTTHAST, H. ELLINGER and P. KOBE                              | 83 Possibilities of graphic simulation of NC programs  |
| R. GATALO, J. HODOLIC, M. ZELJKOVIĆ, V. MILOSEVIĆ and Z. KONJOVIĆ | 91 Achievements in the development and future development of SAPOR-S systems for automatic programming of NC lathes            |
| P. L. B. OXLEY  | 103 Modelling machining processes with a view to their optimization and to the adaptive control of metal cutting machine tools |
| T. ALTAN  | 121 Advances in metal forming processes  |
| I. GRABEC   | 129 Explanation of random vibrations in cutting on grounds of deterministic chaos  |
| B. IVKOVIC  | 135 Manufacturing process productivity through tribology   |
| Y. M. SOLOMENTSEV   | 139 Scientific problems of flexible manufacturing systems development and methods for their resolution                         |

G. F. MICHELETTI	141 Application of new technologies for fully integrated robotized automobile engine production
O. BOSSI and A. MILETTO	149 Gear shaving center for FMS
C. FIORITO	155 High-speed, high-power spindles for flexible manufacturing systems: applications and results
J. R. GARTNER and E. C. COBB	165 Natural frequencies and biplanar response of generalized rotating spindle systems
M. VUKOBRATOVIĆ and D. STOKIĆ	175 Application of robots in assembly automation
G. DUELEN, U. KIRCHHOFF and J. HELD	181 Methods of identification of geometrical data in robot kinematics
G. SELIGER	187 Rules for expanding robot applications
A. KRALJ, T. BAJD, I. ČIBEJ, B. ŠOLAR, D. RUDEL, Z. BALORDA, I. VERDENIK and D. KORITNIK	197 Robotized rectifier bridge assembly incorporating diode classification and dependable positioning
J. LENARČIČ, B. NEMEC, U. STANIČ and P. OBLAK	203 Design of robot manipulators based on kinematic analyses
A. FRANK and A. SCHMID	211 Grinding of non-circular contours on CNC cylindrical grinding machines
W. DEKEYSER, R. SNOEYS and M. JENNES	219 Expert system for wire cutting EDM, based on pulse classification and thermal modeling
G. RICCIARDI, M. CANTELLO and F. G. MICHELETTI	225 Laser welding of light alloys and superalloys
J. MOZINA	233 Some prospects for pulsed laser manufacturing processes
V. B. ŠOLAJA, M. LJ. DIMITRIĆ and LJ. S. LUKIĆ	241 On the two cases of Yugoslav attempts in adaptive control
L. TRONTELJ, J. TRONTELJ, D. RAIČ and B. SOBOČAN	245 Microelectronic tools for the individual system engineer
P. LESKOVAR and M. KOVAC	253 Surface integrity as a quality criterion for fabrication processes
A. SOSTAR	259 Coordinate measuring techniques in quality assurance
T. SATA	267 Methods of cooperation among government, research institutes, universities and industry which further the development of manufacturing technology in Japan
G. SOHLENIUS, S. HJELM and G. LANDSELL	271 FMS—research and industrial development in coordination
I. ŽUN	277 Some fundamental aspects of manufacturing science highlighted by dynamics and thermodynamics

M. HORVÁTH

285 Manufacturing engineering: the birth and growth  
of a new science

293 Book Review

295 Announcements

I Software Survey Section

Volume 4 Number 3/4

1988

International Conference on Manufacturing Systems and Technology of the Future, M.I.T., U.S.A., 1987

**Contents***Papers*

- |   |  |
|---|--|
| N. P. SUH                                       | 297 A perspective on manufacturing   |
| K. ULRICH and W. SEERING                        | 309 Computation and conceptual design  |
| M. GLAVONJIĆ and V. R. MILAČIĆ                  | 317 A practical procedure for conceptual design and testing of<br>machine tool structure                               |
| U. ROY and C. R. LIU                            | 335 Feature-based representational scheme of a solid modeler<br>for providing dimensioning and tolerancing information |
| A. CHANDRA                                      | 347 A synthesized design for arc welding processes   |
| P. C. SHEU and R. L. KASHYAP                    | 359 Programming robot systems with knowledge   |
| V. CHANDRU, J. J. KLUG III<br>and R. VENKATESAN | 369 PERCE's GRIPES: a robot grasp planner  |
| S. HARA and K. AZUMA                            | 379 Cell production system for assembly  |
| K. YUCEF-TOUMI, W. S. LIU<br>and H. ASADA       | 387 Computer-aided analysis of reconfigurable fixtures and sheet<br>metal parts for robotic drilling                   |
| Y. KONISHI, T. AOYAMA and I. INASAKI            | 395 Trajectory generation and control of a five-bar-link parallel<br>direct-drive robot                                |
| M. CELENK                                       | 403 An adaptive machine learning algorithm for color image<br>analysis and processing                                  |
| T. LUNDHOLM, M. YNGEN<br>and B. LINDSTRÖM       | 413 Advanced process monitoring—a major step towards<br>adaptive control   |
| O. MAIMON and G. TADMOR                         | 423 Model-based low-level control in flexible manufacturing<br>systems   |
| A. THANGARAJ and P. K. WRIGHT                   | 429 Drill wear sensing and failure prediction for untended<br>machining  |
| M. A. KRAMER and F. E. FINCH                    | 437 Development and classification of expert systems for<br>chemical process fault diagnosis                           |

R. H. LYON and J. T. KIM	447	Reduced parameter set descriptions for system and event identification
L. MONOSTORI	457	New trends in machine tool monitoring and diagnostics
P. BARTAL and L. MONOSTORI	465	A pattern recognition based vibration monitoring module for machine tools
G. SPUR, F.-L. KRAUSE, H.-J. GERMER and R. RIEGER	471	NC programming and dynamic simulation based on solid models in a CIM strategy
H. SUZUKI, M. INUI, F. KIMURA and T. SATA	483	A product modeling system for constructing intelligent CAD and CAM systems
Y. ITO, H. SHINNO and H. SAITO	491	A proposal for CAD/CAM interface with expert systems
E. ARAI and K. IWATA	499	Product design logic for an intelligent product modelling system
R. EHRISMANN and J. REISSNER	511	Intelligent manufacture of laser cutting, punching and bending parts
J. BUCKLEY, A. CHAN, U. GRAEFE, J. NEELAMKAVIL, M. SERRER and V. THOMSON	517	An integrated production planning and scheduling system for manufacturing plants
J. G. MALEY	525	Managing the flow of intelligent parts
G. CHRYSOLOURIS, K. WRIGHT, J. PIERCE and W. COBB	531	Manufacturing systems operation: dispatch rules versus intelligent control
P. M. FERREIRA and C. R. LIU	545	Generation of workpiece orientations for machining using a rule-based system
C. TSATSOULIS and R. L. KASHYAP	557	A case-based system for process planning
S. KUMARA and I. HAM	571	Database considerations in manufacturing systems integration
S. H. KIM, S. HOM and S. PARTHASARATHY	585	Design and manufacturing advisor for turbine disks
G. SELIGER, B. VIEHWEGER and S. R. KOMMANA	593	Integrated planning of manufacturing systems
D. M. WEBER and C. L. MOODIE	601	A knowledge-based system for information management in an automated and integrated manufacturing system
C. SKEVINGTON and C. HSU	619	Manufacturing architecture for integrated systems
Ø. BJØRKE	625	Towards a manufacturing systems theory
Y.-H. PAO	633	A connectionist net approach to autonomous machine learning of effective process control strategies
H. VAN DYKE PARUNAK, J. KINDRICK and B. W. IRISH	643	A connectionist model for material handling

J. HATVANY

655 Easing the two-way transfer of technology

G. SOHLENIUS

659 Engineering education as a part of industrial society—product quality, process quality and quality in engineering education

R. JAIKUMAR and M. WATKINS

669 Towards an intelligent system for failure effects analysis

D. R. WHITE

683 Development of technology transfer and implementation strategies for intelligent processing of materials
